

HEALTHY VOLUNTEERS NEEDED FOR LIVER MRI STUDY

WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The primary goal of this research study is to learn if an MRI can measure liver health in patients with a specific genetic disease. We are looking for healthy volunteers 7 years and above as a comparison group.

WHO CAN BE A PART OF THIS STUDY?

Individuals 7 years and older with no history of kidney or liver disease.

WHAT WILL PARTICIPANTS BE ASKED TO DO?

Make a single 2 hour visit at CHOP to complete a:

- Physical exam and interview
- Blood draw
- MRI scan of the abdomen

WHAT WILL PARTICIPANTS RECEIVE IN THIS STUDY?

You will receive compensation for your participation.

I WANT TO HELP! WHO DO I CALL?

If you are interested in participating in the study or want to learn more about it, please contact:
