

TEENS WITH AND WITHOUT ADHD & PARENTS NEEDED FOR DRIVING SURVEY STUDY

WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The purpose of this study is to learn more about teens with and without ADHD and their parents as they make decisions about driving.

WHO CAN BE A PART OF THIS STUDY?

This study is open to teens ages 16-18 who recently received their learner's permit and their parent. We are looking for teens both with and without an ADHD diagnosis.

WHAT WILL PARTICIPANTS BE ASKED TO DO?

Participants will complete up to 5 web-based surveys over the course of two to three years, where they will be asked about their experiences related to driving. Participants will also complete text message check-ins and have their driving record reviewed. No-in person visits are required. Participants will be compensated for their time.

WHAT ARE THE BENEFITS?

The information collected in this study may benefit future families of teens who have ADHD, and all young drivers.
