

HEALTHY VOLUNTEERS NEEDED FOR CARDIOVASCULAR STUDY

WHAT ARE THE GOALS OF THIS RESEARCH STUDY?

The primary goal of this research study is to learn if patients with a specific genetic disease are at risk for brain aneurysms or cardiovascular abnormalities compared to healthy individuals.

WHO CAN BE A PART OF THIS STUDY?

We are looking for healthy volunteers age 6 years and above with no history of kidney, liver, or cardiovascular disease as a comparison group.

WHAT WILL PARTICIPANTS BE ASKED TO DO?

Make a single 3-4 hour visit at CHOP to complete a:

- Physical exam and interview
- Blood draw
- Non-invasive heart and blood vessel measurements, including echocardiogram

You will also be given a 24-hour blood pressure monitor to complete at home and return via prepaid mailer.

WHAT WILL PARTICIPANTS RECEIVE IN THIS RESEARCH STUDY?

You will receive compensation for your participation.

I WANT TO HELP! WHO DO I CALL?

If you are interested in participating in the study or want to learn more about it, please contact the study team:
